Quality Assured

At Test Equipment Solutions Today,
we believe the best value for your company's dollar
lies with refurbished equipment—and we're not alone.

More companies than ever are looking to
refurbished equipment to help stretch their budgets.

Whether you want to buy, lease, rent or trade equipment,
Test Equipment Solutions Today can supply you with
quality refurbished products at a great value.

Test Equipment Solutions Today's Refurbishing and Quality Process

- The **Test Equipment Solutions Today** Quality Team completes an initial inspection of the front and rear panel hardware on all test equipment. Switches, knobs, handles, dials, soft keys, and connectors are checked and verified to be in good working order. Hardware is repaired or replaced if defective or missing.
- Bezels are inspected for cracks and repaired or replaced.
- Fans are cleaned and tested for effective operation.
- Refurbished equipment is then calibrated to the manufacturer's specifications and procedures in a calibration laboratory using standards traceable to NIST, the National Institute of Standards and Technology.
- A Certificate of Calibration is provided with all calibrated test equipment.
- All instruments are thoroughly cleaned with approved solvents and all unwarranted labels are removed.
- Equipment is completed with standard accessories and manuals.
- The **Test Equipment Solutions Today** Quality Team completes a final physical inspection of each product to ensure the highest quality standards have been met.
- Our test equipment is then readied for shipment and wrapped in antistatic film for protection from electrostatic discharges.
- All of our refurbished test equipment is shipped using Foam-in-Place shipping technology to eliminate the possibility of equipment damage while in transit.
